## Astronomy Ranking Task: <br> The Seasons

## Exercise \#2

Description: In each figure below a flashlight is shown projecting identical beams of light onto pieces of paper ( $\mathrm{A}-\mathrm{D}$ ) inclined at various angles.

A. Ranking Instructions: Rank the size of the illuminated area (from largest to smallest) on each piece of paper ( $\mathrm{A}-\mathrm{D}$ ).

Ranking Order: Largest 1 $\qquad$ 2 $\qquad$ 3 $\qquad$ 4 $\qquad$ Smallest

Or, the illuminated areas are all the same size. $\qquad$ (indicate with check mark).

Carefully explain your reasoning for ranking this way:
B. Ranking Instructions: Rank the brightness (from brightest to dimmest) of each illuminated area on the pieces of paper ( $\mathrm{A}-\mathrm{D}$ ).

Ranking Order: Brightest 1 $\qquad$ 2 $\qquad$ 3 $\qquad$ 4 $\qquad$ Dimmest

Or, the areas are all the same brightness. $\qquad$ (indicate with check mark).

Carefully explain your reasoning for ranking this way:
$\qquad$
$\qquad$
$\qquad$
C. Ranking Instructions: Imagine that you placed a very sensitive thermometer against the illuminated area of each piece of paper and measured its temperature. Rank the temperature (from coolest to hottest) of each illuminated area (A - D).

Ranking Order: Coolest 1 $\qquad$ 2 $\qquad$ 3 $\qquad$ 4 $\qquad$ Hottest

Or, the temperatures of each illuminated area would all be the same. $\qquad$ (indicate with check mark).

Carefully explain your reasoning for ranking this way:
